Abstract: A favorite essay of the scientific arena is "the portal"--an extraordinary opening in space or time that connects one to distant realms. A portal is a short walk, a guide, a door into the unknown. Physicists call them X-points or electron diffusion regions. They are areas where the magnetic flux of Earth connects to the magnetic flux of the Sun, creating a gentle path leading from our own planet to the sun's atmosphere. Statements suggest that these magnetic portals open and close dozens of times each day. They're typically encountered a few tens of thousands of kilometres from Earth where the geomagnetic field meets the onrushing solar wind. Most portals are small and short-lived; others are gaping, vast, and sustained. Tons of energetic particles can flow through the openings, heating Earth's upper atmosphere, provoking geomagnetic storms, and igniting bright polar auroras.

Magnetic portals are invisible, erratic, and elusive. They open and shut all of sudden "and there are not any signposts to guide us in, states by physicists.

The portals are connected to the stargates of the multiverses, having their own frequency timelines e.g 7.833hz. According to the individual resonance, humans are made contact or travels are done whether astral or other means as per human experiences.

1. INTRODUCTION

When we name it as a disease, We are asserting fundamentally that there is a certain level of misunderstanding in the system. If we try to know what is understanding in human experience, what we perceive, how we perceive the nature of existence is far more significant than what we think in our head. From perception, comes the shifting of energy fields into human experience into subtler levels and from distortion of frequencies come to the grosser levels and more concretised

timelines of the existence. When we talk about the human system, we are concerned about its different bodies in one place like the physical body, mental body, emotional body, energy body and the bliss body. If we see it as different timelines of realities and dimensions coming together and forming a massive collage in its complexities and intelligence, it would be easier for us to understand the human mechanics. Every other body has its own purpose of reality in the sonic frequency timeline of realities. In a fractal moment, they are itself a universe of their own.

To find health, we must not only bring each body to its fruition but also we must integrate the whole resonance and bring a coherence with the bigger geometry of this existence. We must know this, only when we are coherent with larger cosmos, we are in sync with the rest of the existence, or else these bodies will fall apart not been able to form and fit into each other, which we term it as a disease.

2. METHODOLOGY

When we talk about Shoonya we are concerned about the mind consciousness for it has to come to a certain level of understanding to materialise a certain timeline reality into the individual existence. Second is the Body detox to ascend its vibration into the light body. For instance, the human body right now is vibrating in 3Hz. If we manage to ascend it to 90Hz, The system is ready to connect to a certain timeline having Heart frequency. The heart is the only structure which is holding the upper three and lower three structures and bodies together in form and shape, which is, in fact, vibrating in 1000Hz. If the body is managed to vibrate in the same parallel

timeline-like of heart, naturally the body will convert to a light body. Thirdly, Shoonya bylaws to integrate into the system.

With it, Shoonya having the honour of the Teleportation device and the different programming done in its cellular level, different bodies of the human system can be mathematically engineered as to connect to certain timelines of realities. The resonance of this human system has to match the resonance of the stargates or any definite portals so as to shift the energy and materialise as one wants to so as to teleport.

In this Quantum of existence, there are infinite timelines, Either you know health or you know the disease. Everything is the mere experience of manipulation of energy. Till energy will keep moving, we have different timelines of realities, not a single one is secured and stable as humans are thinking of. We have to know that this existence is insecure and that is the beauty of it. But humans trying to get security have ripped off the planet in its essence. It is time we know the quantum of existence, how this existence is working without any security of its own existence. Tomorrow it may evaporate, and no changes will be happening in the existence, it will be happening the way it is now until a new mathematical geometry is rewritten.

3. SIGNIFICANCE

With the evolution of each body, a whole new perception

would be attached to the human system on the totality and as we know the perception is directly linked to the DNA lineages. With the upgrade of DNA, it would be a whole new possibility for the human race. Because the 5 bodies are galactic in nature, the earth, the water, the fire, the Air and the Akash are of the existence, it is neither coming from us nor it is human-made. Because the elements are of different galactic forces, as soon as the upgrade will be happening, humans will regain a sense of making contact with the rest of the universe and it is happening. Within a few years, things will change, a transformation is ready to happen, from all over the world, people are claiming their contact with different beings outside of earth, portals are being opened, timelines have been halted, moulded and things have been managed and is ready for ascension. It is time Shoonya acts as the bridge between these two dimensions of life. One is health, other is liberation. In between Shoonya will provide humans with the crucial technologies for human ascension and for their connection with the whole.
