

Preface

It gives us a great pleasure to place the first edition of the book “Practical Exercise Book of Plant Physiology & Plant Biotechnology” in the hands of esteemed readers. The broad plan of this practical exercise book covers the wider aspects of practicals performed in the subject of Plant Physiology & Plant Biotechnology in UG and PG level in most of the universities in India.

The exercises are developed in the same consistent fashion (aim, introduction, requirements, reaction, procedure etc.) as far possible to fits with the concise needs of students and research scholars to provide brief, and easy understandable manner to perform as well as prepare or maintain their practical records for academic purposes.
