**Abstract**—*What we call as genetics are nothing but mind's perception. If you are able to change the way you perceive the world, you can bring control over your genes. But, we do have differences between every two individuals genetically but the haploid DNA can be the same even after Billions of years. So here comes the significance of certain decoding of the gene, which in India we call as Gotra. It is the lineage that keeps going from ancestors to their descendants without a break.*

## INTRODUCTION:

Herein this land, the wisdom on genetics was mind-boggling since millennia even before modern science, talks about the microscopic detection of two similar genes. They knew the science behind putting it in a certain energy form, which was being created in a certain space like specific temples in India. Not every temple worked the same way, and particularly not the same temple for everyone. So, when a person used to go to a temple, he would list out the particular gotra, so that certain things could be done energy wise. But as the tradition is no more the same now, anyway these sciences are no more working for the person for his health & well-being. However, we had been working on Sunya drugs so that it can work both spiritually and physically on the apparent Man.

## METHODOLOGY:

Fire is the one element which is neither physical nor non-physical, it is the element which has the power of transforming physical to non-physical. It is in the overlapping zone of the two. So, we hold fire as a possibility in this land. What you call as the earth or the water elements they can be transformed into more subtler elements as that of air. There are different herbs and certainly minerals which have both spiritual and physical effects on a human, but they can not be ingested directly into the system because of the bioavailability of such drugs. However, if you can let them ooze out into air, it works as miracles. It basically works in the different nadirs, energy body and the physical body of the system. These drugs if inhaled by the human, they can release blocks in the system and in many ways do have the ability to loosen certain psychic impressions in the system. Also, these drugs purify the system in & out. They are also being used to balance and detoxify the air particles in spaces which are usually blocked in certain

ways due to many different influences. Today, modern science is saying about the presence of billions of toxic air particles in the heart of humans. But, we cannot blame the industries solely in this nation at least because they hold very small percentages which can not do that much of a harm if we really look into the matter. For that reason also planting trees is much needed in this nation with many different factors to bring into notice. At the same time, we can not say of using Sunya drugs to bomb in the air for detoxifying it. If we take care of different factors causing the pollution, we can really work through it. But, for that to happen, it is not one year project, just to implement the law would itself take time and when things would start happening would take another length of time. It needs dedication, for that to happen we need responsible citizens of a nation. We also have Sunya drugs which can work through water element, physically purifying the water and working through the energy body of the said element. We have other drugs which are maintaining the necessary energy of the human system. These drugs are also acting in the Gmo products for neutralizing chemicals in crops, fruits and vegetables maintaining the energy level in the food. The way Sunya cultivation is done, is also of a certain type, which is organic in its essence and maintained in a certain way that the vegetables or the fruits are only producing nutrients which are necessary for certain individual-what he lacks, the plants are producing them in enough quantities. Not every leaf, or every fruit is for everyone, they vary depending upon the certain cultivation by certain individual. Sunya is a system of its own, having thousands of formulations which can be exercised for human well-being. Sunya system also includes dairy farm. Here, the cows are worked upon in certain ways so that their different products are of higher and lighter vibration, not by forcing them using stuffs but infect by evolving the system so that they exhibit lighter frequencies in certain ways. There are basically ways of doing things; these are sciences which we need to regain for human fulfillment. If we do not do what we cannot do, it is okay but if we do not do what we can do, it is a disaster. Let's make this happen for human well-being.

**SIGNIFICANCE:**

If plants and trees are going to consume human-made different chemicals, what makes you think, these trees will enable health for human well-being. It just can't. Because as much as we need to generate health from inside, we must take care of the nourishing factors and influences from outside too at the same time. For instance, After assessment for decades, it is seen that Dopamine (DRD2) Serotonin (5-HT1B), their Transporter (VMAT1) and Oxytocin (OXTR) were highly regulated by the effects of Sunya drugs. The DRD2 minor allele was found association with major lifetime depressive disorder(MDD) which was overcome by the use of such our drugs and working on different areas in this human system. This human mechanism is a complex geometry if we do not have wisdom on this mechanism what we do will be just accidental. We had to work on such drugs so that people who can not turn inward can take the benefits of such phenomena's by using such a highly sophisticated system of Sunya. If these drugs can be used with minute details, the gene alleles can be given frequency structure in alignment with the cosmic nature of the existence because mind creates matter and matter can be altered by such drugs so we are not only successful in taking charge of the body mechanics but also the mind matter can be taken charged and the very shape and form can be altered by proper use of Sunya. But, it is of no use if we know the fact and still are processing with the old ways of doing things. It is time, with the hype of technology if we can spread this among people as much as we can, we will not regret it. Because today or tomorrow we have to go through this one way or the other, if we really want health as different health experts are saying Sunya is a next generation system of medicine and it is The only way to health, we understand and recognize it today or tomorrow is the only question! Physicality cannot be the only dimension we look into discarding the other sheathes of this system because health comes only after we are aligned spiritually, mentally, emotionally, physically and energy-wise. If the doctors and the health experts won't know the system to its fullest depth and dimension of course we need to hold hands and walk one by one, it is not that it is quite impossible but what can happen within years of time, we have to wait for the same for millennia. If there is no openness of mind, it will of course take time. When this is the right time, even Quantum is saying things the cure is possible by theory and Sunya and Yoga are saying it is possible practically, we do not know why we are waiting for it and investing billions on Research for human health instead of working from a definite way of possibility. When you band together and work co-operatively, you are smarter, stronger and more successful. You need each other so that you learn from one another and with cooperation in the physical world, the human race can progress and evolve. With the human race, you are learning how to survive and live in harmony with one another. If you were in 'spirit' form, it would be too easy for you to quickly leave and escape an uncomfortable situation on earth. For this reason, being human helps you to slow down, it grounds you to your responsibilities

on earth and it helps you to learn how to cooperate with others and work things out for the greater good for all of us.
